Tutti i nostri vasi sono realizzati a mano nel nostro laboratorio. Ogni pezzo è un viaggio nell'infinito delle possibilità, plasmati da gesti unici che ricercano l'essenza stessa della forma.

Il silicone diventa la tela su cui dipingere visioni, un materiale elastico che accoglie il tocco manuale e si trasforma in opere d'arte senza tempo. Ogni vaso è unico, e porta con sé le tracce del suo creatore.

Nel nostro lavoro, la ricerca dell'unicità del gesto è il cuore pulsante che anima ogni creazione. Ogni piega, ogni curva è frutto di un dialogo intimo tra mente, mano e materia dove il silicone si adatta ad una visione artistica per dare vita a forme sorprendenti e suggestive.

I nostri vasi in silicone sono più di semplici oggetti decorativi: sono testimonianze tangibili di un processo creativo senza limiti, dove l'arte si fonde con l'innovazione per dare vita a pezzi destinati a lasciare un'impronta indelebile nella mente di chi li osserva.

Attraverso il silicone, esploriamo i confini della possibilità, trasformando l'ordinario in straordinario.

All our vases are handmade in our workshop. Each piece is a journey into the infinite possibilities, shaped by unique gestures that seek the very essence of form.

Silicone becomes the canvas on which to paint visions, an elastic material that welcomes the human touch and transforms into timeless works of art. Each vase is unique, carrying with it the traces of its creator.

In our work, the search for the uniqueness of gesture is the pulsating heart that animates every creation. Every fold, every curve is the result of an intimate dialogue between mind, hand, and material where silicone adapts to an artistic vision to bring forth surprising and evocative forms.

Our silicone vases are more than mere decorative objects: they are tangible testimonies of a limitless creative process, where art merges with innovation to give life to pieces destined to leave an indelible mark on the minds of those who behold them.

Through silicone, we explore the boundaries of possibility, transforming the ordinary into the extraordinary.

Ciffo

Alessandro Ciffo dal 1997 produce e distribuisce nel mondo, attraverso i canali di prestigiose gallerie milanesi, collezioni di opere considerate crocevia tra arte e design.

Autoformazione e autoproduzione sono le parole chiave del suo percorso, caratterizzato dalla sperimentazione a tutto tondo delle caratteristiche tecniche ed emozionali del silicone, suo unico medium, capace di esprimere un linguaggio contemporaneo, originale e in continua evoluzione.

Nel 1998 presenta la prima collezione di vasi interamente realizzati in silicone dal 1999 al 2022 realizza piu' di 30 collezioni di vasi e accessori per la casa, alternando limited edition a pezzi unici; parallelamente avvia la ricerca bidimensionale, proposta come "silicone painting" e crea i presupposti per nuove soluzioni cromatiche e grafiche applicabili al settore dell'arredamento

Nella sua ricerca è importante il dialogo con le discipline e i materiali che hanno sviluppato le grandi maestranze italiane, dalla pietra e il marmo, alle ceramiche e il vetro, da Carrara a Faenza da Vietri a Murano.

Gli ultimi anni sono caratterizzati dalla nuova collaborazione con la galleria milanese Rossana Orlandi con la quale intraprende la sfida della sostenibilita' e della responsabilita' dell'arte, introducendo un ciclo di riutilizzo totale degli scarti di produzione del proprio atelier.

Since 1997, Alessandro Ciffo has been producing and distributing worldwide, through the channels of prestigious Milanese galleries, collections of works considered to be at the crossroads between art and design.

Self-education and self-production are the keywords of his path, characterised by allround experimentation with the technical and emotional characteristics of silicone, his only medium, capable of expressing a contemporary, original and constantly evolving language.

In 1998 he presented the first collection of vases made entirely of silicone from 1999 to 2022, he realised more than 30 collections of vases and home accessories, alternating limited editions with unique pieces; at the same time he started two-dimensional research, proposed as "silicone painting" and created the premises for new chromatic and graphic solutions applicable to the furnishing sector

Important in his research is the dialogue with the disciplines and materials developed by the great Italian craftsmen, from stone and marble to ceramics and glass, from Carrara to Faenza from Vietri to Murano.

The last few years are characterised by his new collaboration with the Milanese gallery Rossana Orlandi, with whom he takes up the challenge of sustainability and responsibility in art, introducing a cycle of total reuse of production waste from his atelier.
